EDUCATION

Federal University of Oye-Ekiti –
Bachelor's Degree, Linguistics and Languages (majoring in computational linguistics)
2016 - 2021

ABOUT ME

Hi, my name is Joseph, Joe for short and …. I code 🔥

Languages seemed to be the idea when I started a four-year journey into earning a BA in linguistics, but halfway into my third year, I rooted my passion into coding. Ever since, my life made sense to me. Just at the moment I viewed my first tutorial on the basics of web development, it was just right. Vision spinning in my head like an unending "eureka!".

Seeing coding syntax as a language, I began learning and speaking my way through my journey :). In codes. I enjoy every part of frontend development, from the structure of the code to how each building block of elements can be perfectly placed and designed to form a magnificent UI and how it can be brought to life with lots of data and perfect code. I am well proficient in Reactjs , React-native, NodeJS, mongo DB, SQL and I've master the act of styling with bootstrap, tailwind CSS, Sass and CSS of course. With knowledge on the wonders of git, I can handle code versions or branches in git terms and git command work arounds. I'm currently digging my hands into flutter and I'm really open-minded to acquiring more framework or languages. Like they say, the learning continues.

I cherish the usefulness of wonderful creations in the tech and how it can build a better world in the future and I want to be part of that future.

EXPERIENCE

JD Lab (An EduTech Firm), — Frontend Developer

Niger State, Minna.

Dec 2021 – November 2022

Roles

- Upgraded **JSP (JDLab School Portal)** — **A School Management System**
