CAREER OBJECTIVE

Hardworking, highly motivated professional eager to lend combined knowledge and skills to enhance both UI performance and functionality. Operates well in both individual and team capacities, leveraging seasoned work ethic to quickly adapt to different processes and drive company objectives. Resourceful and results-driven with a passion for growth and efficiency to meet company needs and increase service value.

EXPERIENCE

FRONTEND DEVELOPER,   Akure, Ondo

Glimere, March 2023–August 2023

- Wrote style guidelines for client-facing applications developed by cross-functional teams
- Imparted specific expertise and knowledge to peers and staff through individual mentoring and team efforts
- Tested new features for bugs or defects to verify proper working order
- Integrated third-party libraries and APIs into existing applications for improved functionality
- Used version control systems such as Git to manage source code repositories in a team environment.

FRONT END DEVELOPER,   Dallas, TX

Core Outreach Services(CORS), August 2022–August 2023

- Provided ongoing maintenance support for existing projects after deployment
- Identified and resolved browser compatibility issues across different devices and browsers
- Translated flat design files to clean, accessible and interactive user experiences.
- Developed and maintained user-facing websites using HTML, CSS, JavaScript, and ReactJS.
- Monitored application performance metrics and troubleshoot any technical issues encountered during development.

FRONT END DEVELOPER,   Minna, Niger

JD Lab, December 2021–January 2023

- Ensured accessibility compliance through testing, validating, and debugging web applications
- Optimized website performance by reducing page load time and improving the efficiency of AJAX requests
- Collaborated closely with the back-end developers to integrate API calls into the front-end codebase.
- Learned new front-end programming languages and methodologies to perform tasks.
- Designed and developed new features and functionality for existing systems.
